

## HIPAA Compliance Statement

The Congress of the United States enacted the Health Insurance Portability and Accountability Act (HIPAA) on August 21, 1996. This law impacts all areas of the health care industry and was designed to provide insurance portability, to improve the efficiency of health care by standardizing the exchange of administrative and financial data, and to protect the privacy, confidentiality and security of patients' health care information.

- Electronic Transactions (October 2002)
- Transaction Code Set (October 2002)
- Security (April 2005)
- Privacy (April 2003)

MITEM Corporation is committed to comply with the Health Insurance Portability and Accountability Act (HIPAA) Standards. HIPAA Security Standards compliance is accomplished by ensuring systems, policies and procedures meet or exceed all required and addressable implementation specifications. Interface and database connectivity is encrypted and/or password protected and electronic access is limited to only those entities that have been authorized. Additionally, MITEM has implemented SSL Digital Certificate Authentication with Blue Iris Products for a secured method of accessing protected health information (PHI).

We will continue to monitor the latest HIPAA news and legislation to ensure our compliance, where required and as agreed upon with our clients.
